Declass Review by Nima / DoD

TID-267/67
1 November 1967

MEMORANDUM FOR: Chief, Multisensor Working Group, NPIC

SUBJECT: Suggestions on Completion of Textual Data on
NPIC Requirements Document

1. In your agenda for the twenty-second meeting of the MSWG you indicated that various sections of the outline would be assigned to MSWG members for the completion of textual data. I concur with the suggestion, however, I would prefer a brief statement rather than a complete and final write-up. The brief statement should indicate what information they would like from an impending satellite or aircraft reconnaissance system and why they would like this information, as well as their preferred lead-times. Their statement can be simple and straightforward. If there are no objections from the majority of the MSWG members, I would prefer to weave their brief statements into the final document in my own terms for the sake of continuity in writing style and philosophy.

2. I would also prefer that emphasis be placed on the outline of the document rather than the textual data that I am including. The textual data has neither been edited nor has management reviewed it for policy infringement. I would appreciate knowing, however, whether or not I am proceeding in an acceptable form; any such suggestions would be appreciated.

3. If the above is agreed upon, it is requested that replies from each of the assigned members be submitted to me by 20 November 1967.
